Photoshop, Illustrator, Canva, CapCut

EDUCATION & LANGUAGES

Technical Degree in Graphic & Web Design (TEC), in progress

Bachelor's in Natural Sciences, UNED, 2023 – present

English B2 (upper-intermediate), technical reading and communication in bilingual environments

PROFESSIONAL PROFILE

Operations and customer-facing professional transitioning into software development, with hands-on experience building and deploying applications with Python, Streamlit and JavaScript. I build custom apps and tools that simplify processes, and websites.

FEATURED PROJECT

Ticksy

In real use · ≈100 invoices a month

App to track supplier invoices in restaurants. It came from a real problem at my job: invoices were getting lost and money wasn't showing up in expenses. I took it from concept through development, testing, deployment, and iteration.

Includes AI invoice reading, integration with the Loyverse POS, and support for multiple restaurants.

PWA · JavaScript · Supabase · Loyverse POS

More projects: Deep Expenses, personal expense tracking app · Interactive website for a book (in development).

PROFESSIONAL EXPERIENCE

Founder & Developer, Divende

Independent · Present

Development studio

- Develop custom apps and tools that simplify business processes, and build websites for small businesses.
- Deploy with GitHub staging environments to validate changes before release.
- Use AI tools (Claude, Gemini, Google Flow) to speed up code, content, and graphic assets.

Floor Manager, Café Kracovia

2020 – Present

- Support service decision-making and coordinate 4 servers. Have trained 15+ people.
- Spotted lost invoices and unrecorded expenses, and built Ticksy to fix it.
- Place inventory orders with 4 regular suppliers and stay in constant contact with other suppliers.

Judicial Technician, Judicial Branch of Costa Rica

2023 · 3 months

- Managed official documentation under confidentiality protocols and provided administrative support in judicial processes.
