

NOAH CUENCA CHACÓN

Software Developer | Python | Streamlit | Custom Apps & Websites

San José, Costa Rica | noahworkscuenca@gmail.com | noahcuenca.com

PROFESSIONAL PROFILE

Operations and customer-facing professional transitioning into software development, with hands-on experience building and deploying applications using Python, Streamlit, and JavaScript. I develop custom apps and tools that simplify processes, and websites. My app Ticksy, born from a real problem at my job, processes around 100 invoices a month.

PROFESSIONAL EXPERIENCE

Founder & Developer — Divende (development studio) *Independent · Present*

- Ticksy: app for tracking supplier invoices in restaurants, taken from concept through development, testing, deployment, and iteration. Includes AI invoice reading (OCR), integration with the Loyverse POS, and support for multiple restaurants.
- In real use: processes around 100 invoices a month, prevents lost invoices and money missing from expenses, saves time, and keeps expense control organized.
- Kontea: inventory control app for restaurants.
- Custom websites and tools for small businesses, using GitHub staging environments to validate changes before release.
- Use AI tools (Claude, Gemini, Google Flow) to speed up code, content, and graphic assets.

Floor Manager — Café Kracovia *2020 – Present*

- Support service decision-making and coordinate 4 servers. Have trained 15+ people.
- Spotted lost invoices and unrecorded expenses in the venue's invoice flow, and built Ticksy to fix it.
- Handle about 40 orders per service, 2 to 5 drinks each, preparing coffee and cocktails under pressure.
- Place inventory orders with 4 regular suppliers and stay in constant contact with other suppliers.

Judicial Technician — Judicial Branch of Costa Rica *2023 (3 months)*

- Managed official documentation under confidentiality protocols and provided administrative support in judicial processes.

SKILLS

- Software & application development: Python, Streamlit, JavaScript, Supabase, installable web apps (PWA), GitHub, testing and troubleshooting
- AI tools: Claude, Gemini, Google Flow, AI document reading (OCR)
- Technical support, data & process: technical support, data management, process improvement
- Operations: inventory control, supplier purchasing, staff training, CRM, conflict resolution
- Design: Photoshop, Illustrator, Canva, CapCut

EDUCATION & LANGUAGES

- Technical Degree in Graphic & Web Design (TEC), in progress
- Bachelor's in Natural Sciences, UNED, 2023 – present
- English: B1 (intermediate), technical reading and communication in bilingual environments
